Hair and Beauty Salon

BEAUTY MENU

Enhance Hair and Beauty

Enhance Hair and Beauty is a training salon for industry professionals of the future. Our salon is equipped with the latest industry-standard equipment and we offer treatments throughout the academic year for anyone over 16.

Whilst our students are under professional supervision and every effort is taken to ensure your requirements are met, results may vary and not always meet your expectations. This is reflected in our price list.

Important Client Information

Please remember that this is a training establishment and all salon sessions are part of the students' assessments. We would therefore like to thank you for your patience in providing the practical experience our students require to complete their training.

We recommend that clients with medical conditions speak to their General Practitioner (GP) to ensure treatment is suitable.

Appointments

If you would like to book a treatment then please call us on 0203 954 4784, or simply pop into reception and see us.

You can find us on the first floor of London South East Colleges, Bromley Campus, Rookery Lane, Bromley BR2 8HE.

All London South East Colleges' students and staff receive a 15% discount on all services at enhance.

Treatments by our Level 1 students:

Mini Manicure - In a hurry but still want your nails to look good? Then a mini manicure is what you need, which includes file, hand massage and paint.

Nail Art - Why not let your nails do the talking and try one of our many designs to brighten up your look.

Make Up - Let our beauty consultants design a make-up that to fit any occasion.

Mini Pedicure - Consists of a foot soak, file and a foot massage to wake up your tired feet.

Treatments by our Level 2 students:

Luxury Facial - consists of cleanse, manual massage and mask. Ideal for all skin types.

Manicure - Consists of nail file, cuticle work, hand soak, hand and arm massage followed by a nail paint of your choice.

Pedicure - Consists of nail cut and file, basic cuticle work, refreshing foot soak, exfoliation, foot massage followed by a nail paint of your choice.

Waxing - Our waxing methods are used for quick and hygienic removal of unwanted hair from almost any part of the body leaving the body smooth for up to six weeks.

Eye Treatments - Your eyes are gorgeous, and your lashes too. But imagine what professional eyelash tinting and eyebrow tinting will do for the depth and colour of your eyes and the definition of your face.

All London South East Colleges' students and staff receive a 15% discount on all services at enhance.

Treatments by our Level 3 students:

Body Massage - Relieve muscular tension, reduce aches and pains, improves circulation, aids relaxation and reduce stress levels.

Hot Stone Massage - This long, luxurious treatment uses massage and natural deep heat in the form of heated basalt stones to relieve muscle tension and stimulate the body's own detoxification processes.

G5 Vibratory - Used within the massage treatments to assist in the breakdown of hard fatty tissue.

Body Vacuum Suction - Vacuum suction is aimed at improving blood flow and Lymph circulation. Lymph fluid transports metabolic waste and fatty materials via the lymph nodes and lymphatic system.

Body Faradic - Well known as electrical muscle stimulation, this treatment is used to tone and tighten the muscles of the body.

Body Micro Current - Our micro current system can help to shape your body and increase muscle tone.

High Frequency Back Facial - A full cleanse using hot towels and a gentle steam, a thorough exfoliation followed by a deep relaxing massage and mask - a perfect treatment for a problematic area.

Galvanic Body - Galvanic treatments for cellulite incorporate a low electrical current that breaks up fluid and fat cells and increases the movement of the lymphatic system.

Facial Vacuum Suction - This treatment is aimed at improving your blood flow and lymph circulation.

Facial Faradic - This facial will lift and tone your facial muscles, while you relax.

Facial Micro Current - This is a facial to redefine the decollate, neck and face contours and give them a lifting and strengthening effect.

High Frequency Indirect - This treatment helps increase blood circulation, increases your sebaceous glands which produce sebum/oil on your skin, it will improve your skin texture and soothe your nerve endings.

High Frequency Direct - This direct current helps dry out spots and has an antibacterial effect, so is good for oilier skins or those with a few specific acne blemishes.

Galvanic Iontophoresis - Ideal for all skin types, iontophoresis will treat your specific skin type.

Galvanic Desincrustation - Softens and cleanses skin, removes waste products, stimulates blood circulation, improve colour of sallow skin, increases cell metabolism. Used on oily, seborrheic and sluggish skins.
